

VALTES ADVANCED TECHNOLOGY

LET'S START OUR PARTNERSHIP

SOFTWARE ENGINEERING AND QUALITY TESTING

We believe that products made in Japan have high quality. It is important to put in the best effort to deliver every software, service, or system with customers' true needs in mind. Quality yields great customer satisfaction and builds stronger relationship going forward.

In VALTES Advanced Technology, we showcase the Japanese work culture of integrity, discipline, and quality. Loyalty, which is essential to any partnership, is paramount in our culture. We embrace all business challenges with the Filipino spirit as we are known for our hospitality, humility, and friendliness.

Partnering with us can immerse your Software Engineering and Quality Testing Projects in a diversified culture and innovative work environment that can provide extraordinary milestones. Working with our Offshore Team will absolutely become a rewarding experience.

Let's start now and celebrate success together.

Why partner with VAT?

Embrace Quality and Security in a Cross-Cultural Landscape

Our standardized Business Procedures, high-caliber Quality Measures, and true sensitivity to Information Security can drive project milestones and increase productivity in your operations. Working in a cross-cultural environment and understanding different languages, especially English and Japanese, are some of our key competencies. These unique traits take our partnerships to a higher level.

Take Advantage of Our Offshore Development and Testing Services

With the availability of our young and skilled professionals, we can streamline the processes in your projects or operations for a more seamless transition. Our experience working with a wide array of industries can yield better results as we apply the things that we learned from various projects.

Choose a More Cost-Effective Solution

Our organization applies the accumulated expertise that is inherited from its parent company in Japan to provide services that meet our clients' needs. Operating and labor costs are less expensive as project duration is definite compared to hiring your own regular employees to do the job. We are able to work with several business industries at different rates.

WHY VAT?

- VALTES Advanced Technology, Inc. (VAT) – a subsidiary of VALTES Co., Ltd., a specialist in the field of Software Testing.
- We deliver quality as one of our competitive advantages through the work values inherited from Japan and the warm culture strengthened in the Philippines.
- VAT has a proven track record of serving companies across various industries such as Finance, Banking, Retail, E-commerce, Information Technology, and other services.

Our transnational group of companies has become one of the eight ISTQB® Global Partners (www.istqb.org) in the world and the first organization to achieve **ISTQB® Global Partner** status in Asia. This validates that quality is our utmost priority.

VAT guarantees to keep your organization's assets secure as our company is certified compliant with the requirements of **ISO/IEC 27001:2013**. This assures that your confidential information, private data and other intellectual properties are safe with us.
